

## GRAZIA HEALTH & BEAUTY

The new 'pillow no-no' filler... The arrival of a new, gentler midi filler... Dr Ayham Al-Ayoubi says, 'Ellanse stimulates collagen growth for up to four months after'

The new midi filler... The quick way to lift dull complexions... The new midi filler promotes collagen growth

**THE 'PILLOW NO-NO' FILLER**  
 'Pillow face' is the curse of skin-plumping treatments. So the arrival of a new, gentler midi filler that actually promotes collagen growth for a natural result is causing a major buzz in the beauty world. Dr Ayham Al-Ayoubi says, 'Ellanse stimulates collagen growth for up to four months after'

### «THE NEW MIDI FILLER PROMOTES COLLAGEN GROWTH FOR A NATURAL LOOK»

treatment. Then the filler is absorbed and passed out of the body, leaving no residue. Because you grow your own collagen, it's a very natural look – no "pillow face"! The filler plumps sagging cheeks, rehydrates the skin, fills out dark circles and smooths wrinkles. And it's safe, too: water-based Ellanse contains poly-caprolactone (PCL), a soft medical polymer that has been used for decades in medicine. It has passed safety tests to become approved by the tough US Food and Drug Administration. Dr Al-Ayoubi says this is the perfect time to try Ellanse. 'Dermal fillers mean you have to avoid the sun, but dull autumn weather is great for a speedy recovery.' Because Ellanse

lasts for up to five years, it's vital to find a doctor who is very experienced with fillers and can help you achieve a natural look. From £500, [www.lmaclinic.com](http://www.lmaclinic.com)
