

Cosmetic Surgery

Top plastic surgeon **ADRIAN RICHARDS** has nip/tuck know-how

Q I hate the fine lines forming around my mouth. What can I have done?

STELLA, 28, GUILDFORD

A There's a new filler called Ellanse, which keeps its volume until it naturally breaks down after one to three years – unlike other dermal fillers, when the effects start to decrease after the injection. Or, if you want a really natural-looking result, try Sculptra, which stimulates your body to produce more collagen over time – but Ellanse gives the same effects without having to wait. It costs from £500 from Dr Ayham Al-Ayoubi at The London Medical & Aesthetic Clinic (www.lmaclinic.com).

Scarlett's pout's all natural. Jealous!
