

# THE LATEST LIPO-LASER KNEE SCULPTING

## Cynosure Smartlipo MPX™ delivers fast, efficient results

Demi Moore is rumored to have had her knees done and now with **Cynosure Smartlipo MPX™** you can resolve the problem of lumpy, bumpy and dimply knees with laser knee sculpting.

**Cynosure Smartlipo MPX™ Laser Knee Sculpting** is the most recent application of Smartlipo technology. Fast, efficient, with permanent results, Laser Knee Sculpting works by introducing pulsed laser energy through a cannula to liquefy fat, which is then removed from the body. The laser energy also coagulates the tissue, thereby sculpting body contours and tightening the skin. The procedure generally causes less bleeding, swelling and bruising than traditional liposuction, resulting in fewer complications and faster recovery.

Taking around 1 hour for the total process (both knees), the treatment takes place under a local anesthetic which results in minimal downtime for the client. On average, around 100-150 ml of fat is removed from each knee. Many clients are advised to wear a support garment for up to 10 days after the procedure to ensure maximum results. Clients can return to work within a few days, the gym after about a week and swimming – about 10 days.

Dr Ayoubi was the first person in the UK to perform this procedure using the **Smartlipo** system and has completed more than 40 of these specific procedures on clients.

**Cynosure Smartlipo MPX™** is the only FDA-cleared, dual-wavelength laser system, designed to efficiently liquefy fat and tighten skin through collagen remodelling.

A superior alternative to liposuction with many benefits:

- Less bruising and swelling (compare to traditional liposuction)
- Less downtime, returning to work the within 1-2 days
- Improves sagging skin and cellulite
- Immediate results
- Local anesthetic only
- Single treatment areas completed in a lunch hour
- Also targets stomach, back fat, double chins, bingo wings and "cankles" (fat calves and ankles)

Average cost of **Cynosure Smartlipo MPX™ Laser Knee Sculpting**: from £1700
